Research and Quality Control

Since 1878, Leonard Coates Nurseries, Inc. has built its reputation on the consistently high quality of its stock. We grow our own stock so that we can control that quality.

Leonard Coates Superior Quality

All LC plants are grown in a very special and rich compost medium. That's why our stock produces a well-balanced top and thriving root system. That is also why it continues to grow and improve in your sales yard and does not require artificial feeding every other week or so.

What does this mean to you as a nurseryman? It means LC quality can maintain a vigorous and healthy growth for both you and your customer. High quality stock means a satisfied customer who comes back often.

Special Delivery Service

Our own fleet of trucks delivers your orders promptly at lower cost than ordinary commercial transportation. Plants are handled properly, by our own experienced personnel, so that they arrive in top condition. SEE INSIDE BACK COVER FOR NEW LOW COST DELIVERY SCHEDULE.

Please notify us promptly if we have made an error. Claims must be made immediately upon receipt of goods. We give no warranty, express or implied, as to description, productiveness, quality, crops or any other matter whatsoever. Our liability in every instance whatsoever is limited to the purchase price.

FINEST QUALITY NURSERY STOCK

Leonard Coates Nurseries has for the past eighty odd years served the nursery trade throughout Northern and Central California with superior nursery stock.

This quality is achieved through supervision of skilled, experienced personnel, constant spraying and fumigation.

Our nursery stock is "NATURALLY" grown in natural and organic media. We do not use the U. C. (University of California) soil mix. Our trees and shrubs continue to thrive and grow while waiting to be sold.

Please write, wire or phone us. It is our privilege to supply all your nursery needs . . . Bush Roses, Fruit Trees, Shade Trees and general Ornamental stock.
